

## USHE Transfer Credit FY0910

Many students take classes from more than one college or university, then seek permission to transfer those credits to another school. A Transfer Credit Evaluation shows students how course credits earned at one college should transfer to other institutions. The nature of the transfer credit is more important than whether the class transfers: you want the credit to be accepted AND count as a required class for the certificate or degree program you are working on. Listed below are contact information and/or links to transfer credit information for USHE institutions as well as private institutions with high levels of transfer credit activity:
